Bandung, Indonesia

Computer Science graduate from Universitas Pendidikan Indonesia with a strong foundation in data analysis and statistics. During my internship at the Directorate General of Treasury (DJPb), Ministry of Finance, I analyzed government budget data using Python, prepared dashboards in Looker Studio, and reviewed reports from more than 20 work units. I also have hands-on experience in web and mobile development, student organizations, and public speaking.

Professional Experience

Ministry of Finance - Directorate General of Treasury (DJPb) - West Java Regional Office Mar 2025 - Jul 2025

Data Analyst Intern

- Analyzed financial data from government work units within the West Java Regional Office using Python (Pandas and NumPy) to identify spending trends and assess budget allocation.
- Analyzed historical budget realization trends to support regional financial monitoring and internal reporting.
- Developed interactive dashboards in Looker Studio and Python-based visualizations with Matplotlib and Seaborn to support regular reporting to supervisors and the PAPK team.
- Reviewed and validated budget realization reports from more than 20 work units to help ensure accuracy and consistency in financial reporting.
- Supported internal assessments of potential transaction anomalies by combining historical analysis with outlier-pattern detection techniques.
- Handled supporting administrative work, including internal document management and monthly evaluation data entry, to keep reporting processes organized and timely.

Education

Universitas Pendidikan Indonesia – Bandung Sep 2022 - Oct 2026

Bachelor of Computer Science (S.Kom.) | GPA: 3.64 / 4.00

- Built a strong background in data analysis and statistics through 5+ projects focused on data processing and data-driven decision making.
- Completed 5+ website-development projects with an emphasis on modern, responsive user interfaces and practical implementation.
- Worked with Python, SQL, R, Tableau, Power BI, Excel, and other analytical tools across more than 100 assignments and projects involving analysis, visualization, reporting, and presentation.
- Actively contributed to more than 20 campus events and committees at different levels and gained practical experience in coordination and teamwork.
- Hosted more than 10 student-organization events as a Master of Ceremonies, strengthening public speaking and audience engagement skills.
- Proficient in English, particularly for technical writing, presentations, and collaboration in multicultural environments.

Selected Projects

- **Regional Financial Analytics Dashboard (2025)**
  Developed Looker Studio dashboards to visualize financial indicators across 27 West Java regencies and cities.
- **Fuzzy-Based Scholarship Selection Web System (2025–2026)**
  Built a decision-support system using 2,000 applicant records, Fuzzy Sugeno, Fuzzy AHP, and fund/quota allocation.
- **Data-Driven Poverty Classification Research (2026)**
  Classified poverty data from 514 Indonesian regions using KNN and PCA, achieving 95.15% test accuracy (SINTA 5).
- **Tokopedia Product Review Sentiment Analysis**
  Analyzed e-commerce reviews using TF-IDF and Naive Bayes to classify customer sentiment.
- **Skincare Product Recommendation System**
  Used TF-IDF and cosine similarity to recommend products from a dataset of 1,138 skincare products.
- **Online Purchase Prediction**
  Applied Random Forest and ROC-AUC evaluation to analyze online purchasing behavior.

Leadership & Organizations

BEM KEMAKOM FPMIPA UPI – Bandung Feb 2023 - Jan 2024

Education & Development Division Staff

Worked in the Education and Development Division, which focused on student academic development, leadership programs, cadre-building activities, and academic competitions.

- Served as Master of Ceremonies for major events such as the 2023 Computer Science and Computer Science Education Freshman Orientation and the 2023 Anniversary Celebration, engaging audiences from students to faculty members and alumni.
- Led the I-TRI Challenge, a GEMASTIK preparation program involving 100+ participants, coordinating the team, designing the event concept, and overseeing program delivery.
- Acted as a mentor in student cadre-building programs, supporting participants in soft-skill development and introduction to organizational culture.
- Hosted more than 10 campus- and faculty-level events as an MC and maintained an interactive atmosphere throughout the programs.
- Managed competition-related initiatives by designing event concepts, coordinating participants, and supporting the implementation and post-event evaluation of 5+ academic competition programs.

Skills

Programming & Data: Python, Java, SQL, R, Pandas, NumPy, Matplotlib, Seaborn

Business Intelligence & Visualization: Looker Studio, Tableau, Power BI, Microsoft Excel

Databases: MySQL, PostgreSQL, MongoDB

Development & Tools: HTML, CSS, JavaScript, Flutter, Dart, Git, Microsoft Word, Microsoft PowerPoint

Microsoft Office & Reporting: Excel, Word, PowerPoint; document preparation, reporting, presentations, and administrative support

Core Strengths: Communication, public speaking, collaborative teamwork, leadership and initiative, adaptability, analytical and critical problem solving
